nVent CADDY Fire Sprinkler and Seismic Bracing Solutions

To help ensure the availability and operation of safety systems after an earthquake event, many building and industry codes now include requirements for the design and installation of seismic sway bracing for non-structural components, such as fire sprinkler, mechanical, electrical and plumbing systems. The innovative line of nVent CADDY Bracing Systems was developed to help keep fire sprinkler systems intact after a seismic event and to minimize water damage resulting from leaks or ruptures.

Bracing Systems provide contractors with high-quality, engineered solutions, which include rigid bracing, cable bracing and rod stiffeners.

FEATURES

- Quick and easy installation
- Lower total installed cost
- OSHPD® Pre-Approved
- cULus® Listed
- Meets NFPA® 13
- FM® Approved

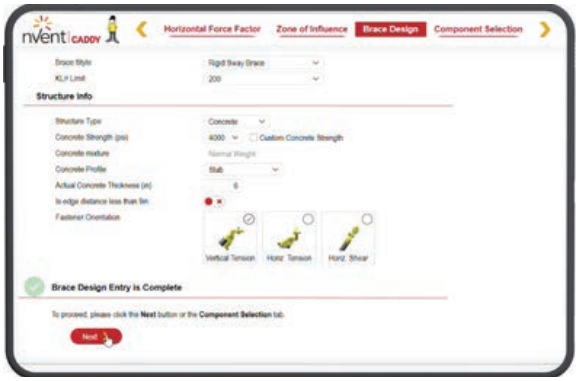

Specifying a Trusted Solution – nVent CADDY Calc Seismic Bracing Calculator

The nVent CADDY Calc Seismic Bracing Calculator helps users determine when seismic bracing is needed and optimizes each brace based on real installation conditions. This self-service, online tool delivers transparent, hand-calculation–style clarity with 3D brace visualization and automated documentation. By validating brace geometry, anchor performance, and installation requirements within NFPA and FM guidelines, nVent CADDY Calc produces reviewer-ready outputs, speeds up the approval process, and simplifies field installations.

FEATURES

- Seismic Design Category (SDC) calculation; eliminates unnecessary bracing and installations
- Custom angle bracing uses actual installed angles to optimize brace length, strength, forces, and material usage
- Detailed calculation method reduces overengineering, brace quantity, and installation time, while staying fully code-compliant
- Comprehensive anchor selection database with integrated engineering checks
- 3D brace preview and embedded 3D visuals in final documentation for fewer field errors and clearer reviewer conversations
- Integrated option to copy/duplicate brace workflow to speed up project design and improve efficiency
- Automated submittal documentation can be directly added to project for review

What's New to nVent CADDY Rigid Seismic Bracing

nVent CADDY is the industry leader in seismic bracing solutions. From our clamps and brackets to innovations with telescoping solutions that fit any size application.

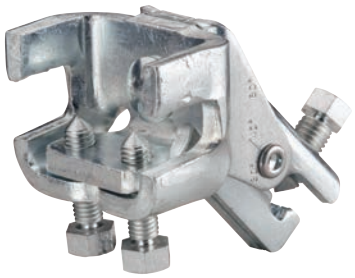

CSBS – STEEL FLANGE ADAPTER

Low profile easily fits into tight spaces

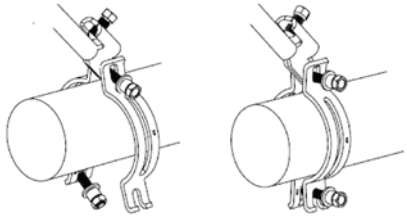

Includes spring retainer clip

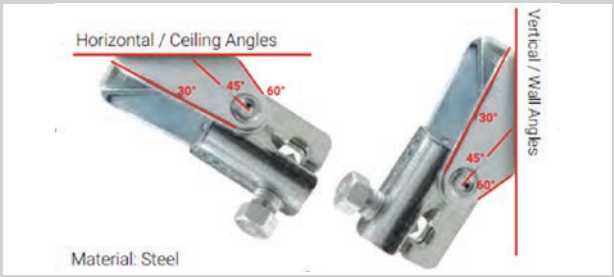

Pre-assembled version available

CSB UNIVERSAL SWAY BRACE

Used in both lateral and longitudinal sway brace applications, the unique slotted holes provide for an easy slip-on installation that eliminates loose hardware. Now featuring both snap-off nuts and bolt head, making installation and inspection of seismic sway braces a breeze.

CSBU UNIVERSAL STRUCTURAL BRACKET

Integrated angle gauge easily displays brace member angle of installation

CSBT TELESCOPING LATERAL BRACE

Learn how to reduce install time.

Watch our Lateral Telescoping Brace Assembly video.

Scan here

This is a complete lateral brace solution that works with 1" to 4" service pipe , including CPVC. A telescoping brace member eliminates the need to measure and cut pipe and combines with a push-to-install v-bolt head making installations up to 80% faster than standard bracing.

CSBQG AND CSBQIK QUICK GRIP LATERAL SWAY BRACES

These lateral braces feature an easy two-step installation that minimizes extra trips between structure and the service pipe. The unique quick attachment eliminates the need of cutting brace pipe to exact dimensions and accommodates both 1" and 1-1/4" brace pipe sizes in a single product.

Learn more about our Rigid Bracing Solutions on page 8.

What's New to nVent CADDY Cable Seismic Bracing

Cable Seismic Bracing is a NFPA® 13 approved solution that offers added design flexibility in instances where there are long drops from structure, a congested ceiling where access to structure is limited, and where a more visually integrated solution is needed in open ceiling construction.

- Effective end of branch line restraint to meet these newer requirements
- Compact, space saving solution, that is easy to move around job site

BATTERY OPERATED TOOL

Speeds and eases both bracing and branch line restraint installation. Provides consistent swaging and reduces the number of swages per sleeve compared to manual tools.

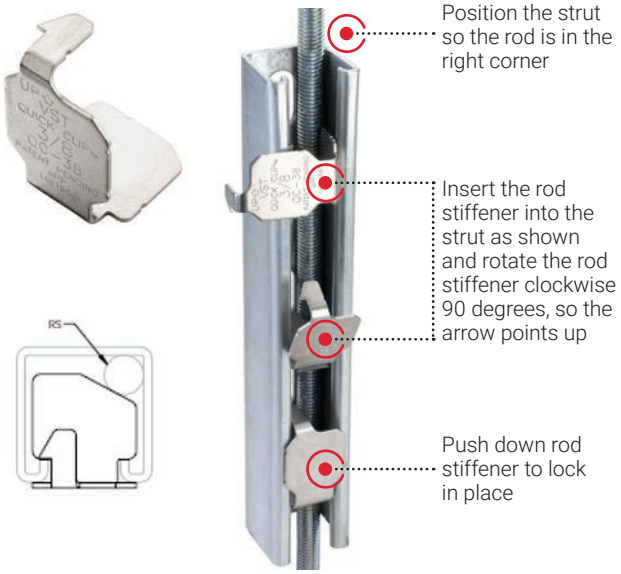

NO PRY CLIP

A structural attachment that maximizes the load capacity on a post-installed concrete anchor by neutralizing the prying effect from the cable load. This increases the allowable design load per anchor and results in the need for fewer bracing locations.

QUICK CLIP ROD STIFFENER

A tool-free rod stiffener that quickly and easily snaps into place, securing a threaded rod to a strut channel to prevent buckling from up thrust forces.

Learn about our bracing tools. Watch our nVent CADDY Quick Clip Rod Stiffener video.

nVent CADDY Rigid Bracing System

The nVent CADDY line of innovative rigid bracing products was designed to provide superior performance and meet the highest seismic load requirements. The products have been designed with the end user in mind and provide contractors with labor-saving features to promote quick and easy installation. The adjustable design can be used with different brace pipe sizes, providing flexibility on the jobsite and reducing contractor inventory. The system of products supports lateral and longitudinal bracing and offers a wide range of structural and pipe attachments.

FEATURES

- Patent-pending lateral braces eliminate need for multiple trips up and down ladders
- Snap-off bolt heads help make installation and inspection quick and easy
- Single wrench size installs all products
- cULus® Listed and FM® Approved
- OSHPD® Pre-Approved (OPA-2629-10) to the 2010 California Building Code and (OPM-0062-13) to the 2013 California Building Code

nVent CADDY Branch Line Restraint System

Traditional methods for installing branch line restraints in fire sprinkler systems are cumbersome and time-consuming. Contractors often cut (and re-cut) threaded rod to precise measurements to restrain the sprinkler pipe with a loop hanger and surge restraint. Traditional methods also commonly require five or more parts per restraint.

To avoid these labor-intensive methods, nVent CADDY has streamlined the process and developed the Branch Line Restraint System, part of the line of hanging and bracing solutions for the fire protection market. Ideal for restraining 1" through 2" branch lines, this innovative system is significantly faster and easier to install than current methods. It attaches directly to steel bar joists, I-beams or purlins, as well as concrete and wood structures. The hardware is installed with only one tool, a 5/16" socket drill driver, which provides significant labor savings and convenience. It features a simple, two-step installation process, allowing a time savings of up to 80% compared to other methods.

Unlike most solutions that only accept 3/8" threaded rod, the versatile Branch Line Restraint System features a swivel attachment that can be rotated to accept 3/8" or 1/2" threaded rod. This allows greater restraint distances from the pipe to structure with 1/2" threaded rod.

The system meets the requirements of NFPA 13, making it ideal for new construction applications. The total system is cULus Listed and FM Approved, and has been pre-approved by the state of California (OSHPD OPA-2629-10 & OPM-0062-13).

FEATURES

- Complete restraint system includes structure and pipe attachments
- Works with 3/8" and 1/2" rod
- Quick and easy installation
- Meets NFPA® 13
- cULus® Listed and FM® Approved
- Pipe attachment includes snap-off heads help make installation and inspection quick and easy
- OSHPD® Pre-approved

nVent CADDY Cable Bracing System

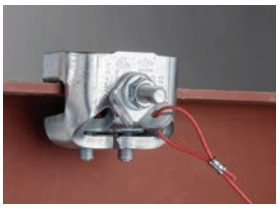

nVent CADDY Cable Bracing is an alternative to rigid bracing and branch line restraint for fire sprinkler systems and is very effective when bracing is required on long drops or when confined/crowded spaces make rigid systems difficult to install. The system includes pre-stretched steel cable, attachment fittings, crimping sleeves and related tools. The system can also be used to brace electrical, mechanical and plumbing systems.

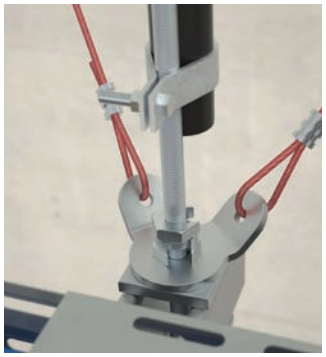

FEATURES

- Color-coated cable conforms to NFPA® 13 requirements and makes it highly visible and easier to identify cable sizes
- UL® Listed
- OSHPD® Pre-Approved (OPA-0619)
- Made in the USA

What's New in Pipe Hanging and Support Solutions from nVent CADDY

Pipe hangers have often been difficult to differentiate between brands, historically. Products on the market adequately hold pipe, but have not undergone any innovation in decades. However, the nVent CADDY product development team is always working to make products faster, safer and easier to install. Our family of products offers unique benefits to the installer and together they are designed to be the most comprehensively innovative offering on the market.

100T HEAVY DUTY TRAPEZE LOOP HANGER

- Provides flexibility for installation in tight spaces and adaptability in system design
- NFPA®-compliant as a trapeze solution
- UL® Listed and FM® approved as both hanger and structural attachment
- Supports up to 8" diameter pipe
- Ideal for suspending stationary non-insulated lines from existing services
- Perfect for when you have limited or no access to traditional structural members
- Installs easily in orientations such as parallel to an I-beam or bar joist

DROP-IN LOOP HANGER

- Next generation loop hanger revolutionizes the installation of pipe
- Once on the guide arm, the weight of the pipe opens the self-closing latch and effortlessly guides the pipe into place
- Integrated rubber sleeve is designed to provide additional grip when adjusting hanger height and reduce hanger rotation around the barrel nut
- Eliminates the need to disassemble the hanger during installation

EZ RISER

- Support vertical pipe quickly and easily by combining three parts into one: a standard riser; a short ear riser; and a stand-off support
- Ready to install out of the box with patented hinge single-piece design
- Single tool installation made possible by carriage bolts eliminating the need for multiple tools when tightening
- Installs up to 60% faster than standard riser clamps (5 EZR's for every 2 traditional riser)
- MSS SP58 compliant and UL® Listed for fire protection applications
- Easily modified to short ear riser for use in tight spaces while retaining UL® listing
- Independent set of bolt holes allow for safer and easier installation in stand-off applications by separating clamping force from offset adjustment

nVent CADDY Pipe Hangers

nVent CADDY Pipe Hangers make any installation job easier with select products compatible with our surge restraint system and that feature contractor-requested finshing techniques, including rolled edges and adjustable drop clearance.

nVent CADDY CPVC Hanging System

nVent CADDY provides multiple options for hanging CPVC pipe. We provide mounting screws with all straps and restraints to save you time on the job.

SOSR TWO HOLE STAND OFF STRAP

- Includes flared edges to protect piping
- Rated for use with CPVC fire sprinkler pipe
- Positions pipe 1-1/2" off the mounting surface eliminating the need for wooden spacer blocks
- Can be mounted in both vertical and horizontal positions on concrete, steel and wood
- Meets the UL® 203 stringent upward thrust requirement
- UL® Listed as both a hanger and pipe restrainer
- Complies with static load requirements of NFPA® 13
- Includes mounting screws
- Can be used with 3TW backing nut on composite wood joist installations

DOSR DOUBLE OFFSET SURGE RESTRAINT

- Provides quick and easy snap-in installation of pipe
- Built-in nail tab allows for fast, temporary mounting to any surface
- Rated for use with CPVC fire sprinkler pipe
- Positions pipe 1-1/2" out and up from the mounting surface eliminating the need for wooden spacer blocks
- Meets the UL® 203 stringent upward thrust requirement
- UL® Listed as both a hanger and restraint in the double offset orientation
- Complies with static load requirements of NFPA® 13
- Includes mounting screws
- Can be used with 3TW backing nut on composite wood joist installations

MACROFIX PLUS NI EZ WITH EASY CLOSURE

- Contains easy closing mechanism
- Plastic washers help prevent crushing the CPVC or plastic pipe and assure a floating fit
- Flared edges and specially designed welding area help protect CPVC piping
- Ideal for installations where space is limited and require services to be ran close to the attachment surface
- Suitable for 3/4" – 2" steel sprinkler pipe
- Eliminates the need to seismically brace when drops are kept within 6" of the attachment surface
- Combo head bolt works with slotted, hex, or Phillips drivers
- Conforms with Manufacturers Standardization Society (MSS) SP-58 (Type 12)
- Meets the UL® 203 stringent upward thrust requirement
- UL® Listed as both a hanger and pipe restrainer

nVent CADDY Rod Lock

The Rod Lock family of products allows contractors to prefabricate complex assemblies at ground level or offsite, and then easily lift and lock them into place by pushing the threaded rod supports into the Rod Lock device. This ingenious technology works with threaded rod with burrs or imperfections, helping to eliminate clean-up time or the need to replace damaged threaded rod.

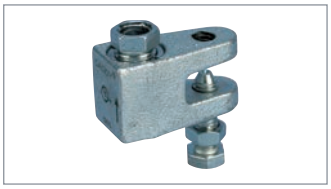

The most unique feature of the system is its breakthrough "push-to-install" design, which dramatically reduces the installation time of threaded rod support structures when compared to conventional fasteners. Simply speaking – Rod Lock is revolutionizing how contractors support conduit, cable tray, lights, ductwork and pipe by helping to make installations faster, easier and more secure.

FEATURES

- Ideal for complex, multi-tier and multi-service applications
- Lift and lock into place without turning threaded rods
- Available for prefab assemblies

nVent CADDY Truss-T Hanger / Joist Hangers

Adapt – with just a twist. The nVent CADDY Truss-T Hanger is an innovative solution that increases jobsite efficiency by quickly adapting to recommendations of bar joist manufacturers. Easily hang with top or bottom chord configuration and replace the use of fender washers and hex nuts typically used today.

Quickly attach threaded rod to a top or bottom chord of engineered open web bar joists with the nVent CADDY Truss-T Hanger. The attachment easily slides through the middle of the bar joist and quickly locks into place when put under load, limiting overhead work.

FEATURES

- Installation of the complete, self-contained system can be accomplished with one hand and requires no additional special tools
- The unique design of the nVent CADDY Truss-T hanger does not need to be tightened like a traditional beam clamp, providing greater adjustability and speed during system alignment
- Meets the UL® 203 requirement
- Concentrically loading the bar joist chord eliminates torsion and/or distortion, adhering to the strict rules established by the Steel Joist Institute (SJI)

nVent CADDY Telescoping Pipe Stand

The nVent CADDY Telescoping Pipe Stand is an adjustable and flexible solution for supporting horizontal pipe runs using a traditional V-Saddle or bolt flange attachment method. The design ensures a faster installation that quickly adapts to a variety of pipe sizes and heights from the floor. The unique V-bolt fastener—with built in nVent CADDY Rod Lock Technology and flange attachment tabs—can adapt to a large range of bolt patterns, sizes and pipe diameters, ultimately reducing inventory and the amount of components needed with over two-thirds savings. Offering a complete out-of-the-box assembly, the nVent CADDY Telescoping Pipe Stand is a contemporary solution for pipe runs.

FEATURES

- Supports and fastens low-to-the-ground horizontal pipe runs
- Telescoping post provides fast vertical height adjustment
- Designed to minimize fabrication and reduce installation time of a complete stand compared to traditional methods
- Integrated weep hole at bottom of stand provides drainage for condensation
- Includes four holes for anchoring base to floor
- Conforms with Federal Specification WW-H-171 (Type 36, 37, 38, 39), Manufacturers Standardization Society ANSI/MSS SP-58 (Type 36, 37, 38)

nVent CADDY Structural Attachments, Hardware and Anchors

SBC STAMPED BEAM CLAMP, TOP MOUNT

- Allows structural attachment to metal beams, bar joist, channel, or angle iron in top mount position only unless used on a parallel flange
- Superior pre galvanized finish available at cost comparable to plain finish cast beam clamp
- Lightweight, one-piece stamped body provides superior strength and eliminates deficiencies associated with castings
- Spins onto threaded rod and allows for easy adjustment
- Made in the USA

PHSW MULTI-PURPOSE PURLIN CLAMP WITH SWIVEL

- Attachment to bottom of purlins and beams to support threaded rod
- Swivel feature option for attachment to purlins under sloped roofs

RS RETROFIT RETAINER STRAP

- Can be installed without disassembly of the hanging system and/or removing the clamp
- Large teardrop-shaped opening is compatible with multiple threaded rod diameters, reducing inventory by 50%
- Coined edge on teardrop-shaped opening locks into rod, eliminating shifting during install
- Complies with NFPA® requirements and meets the UL® load test for retainer straps (3/8" and 1/2" rod sizes)

Built for Projects, Designed for People

FOUNDED IN THE USA, SUPPORTED WORLDWIDE

Founded in 1956 in Solon, Ohio

nVent CADDY was founded and is based in the United States, but has a wideglobal footprint with manufacturing plants throughout the United States, the Netherlands, France, and other regional hubs.

With a commitment to serving the customer with the best products on the market, the nVent CADDY team maintains visibility into the manufacturing process from start to finish.

YOUR TEAM IS OUR TEAM

For decades, our product development team has worked with contractors on job sites to understand their challenges and frustrations. The team then applies these observations, developing solutions fitting contractor needs, including ways to reduce time, increase ease of and overall installation. Once a product is developed, the team validates it in the field with our customers. Over the years, nVent CADDY has created a unique relationship with our customers, even creating products named for our most loyal.

nVent CADDY application engineers and product developers spent over 330 days (and counting!) in the field identifying new ways to create efficiencies and end-user value.

THE BEST TRAINING FOR THE BEST PRODUCTS

nVent CADDY has opportunities for customers to participate in nVent CADDY School, a training session that takes place several times a year, walking users through product installation and benefits. nVent CADDY is also investing in the future by supporting new apprentices as well as those with many years in the field. The nVent CADDY team gets out of the office and into the field to do on-site training and demos for customers as well.

Customer-Inspired Solutions

nVent CADDY's team of experts take the time to create solutions with the customer and their challenges in mind, as well as trends in the current market. Hours of research, product development and engineering goes into the nVent CADDY products customers know and love.

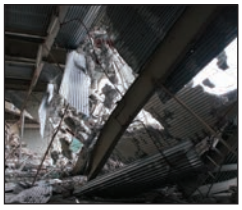

nVent CADDY products help customers solve problems by creating solutions for their biggest obstacles.

BUILDING CODE REQUIREMENTS

PROJECT CHALLENGES

ENVIRONMENTAL FACTORS

FIRE SAFETY

CRITICAL EQUIPMENT PROTECTION

nVent CADDY products solve for these challenges and more, while being engineered to be:

SAFE

Many injuries on the job site are the result of falls. nVent CADDY products are designed to move a significant amount of the work previously completed on lifts and ladders to ground level, greatly reducing the risk of injury. Tool-free components also limit the use of potentially dangerous power tools.

FAST

Every part of an nVent CADDY product is meticulously designed to reduce the amount of total installation time. This is done by making the product install quicker than its traditional counterpart as well as creating products that make it easy to prefabricate complex assemblies on the ground or offsite. Limit rework after installation and meet jobsite deadlines using innovative nVent CADDY products.

EASY

nVent CADDY products are designed to incorporate features that make installation easier. nVent CADDY products are designed to have fewer parts, secure hardware and require fewer tools. The benefits of individual products are multiplied when used together as a system solution.

Products to fit most applications including:

ELECTRICAL • DATACOM • FIRE SPRINKLER • MECHANICAL
HVAC • PLUMBING • ROOFTOP • SEISMIC BRACING

Illustrated Handbook for Simplifying Seismic Protection

Whether you're a part of the design, installation or inspection, installing sprinkler systems is complex—especially in seismic areas. To help simplify and speed up the process, nVent CADDY created a series of handbooks to serve as an easy-to-read breakdown of international codes and standards for seismic protection—particularly for fire sprinkler systems.

DESIGNED WITH YOU IN MIND

You can now request access to our specific series of Seismic Handbooks, tailored directly to your specific needs:

INSTALLATION

- Installations illustrated to meet requirements
- Layout guidance for sway bracing, flexibility and clearance
- Solutions for common challenges
- One-page examples featuring the application of multiple code sections

DESIGN

- Design phase step-by-step guide
- Guided examples with actual calculations
- System selection recommendations

INSPECTION

- Verify product certifications and design/installation compliance
- Avoid rework for installers
